

Tomás

Niederhauser Yetman

Front end Developer

About me

I am a passionate front-end developer. I discovered my passion for programming after being a lawyer for many years. As a result, I decided to embark on a new adventure and study programming, which has been a life-changing decision. I understand that learning is a continuous process and there is always something new that I can learn. I am not afraid to ask for help or search for online resources, such as tutorials, forums, and developer communities.

I enjoy working in environments where people are valued, and where there is a focus on professional and personal development. I like to help others and work in a team. I believe that communication is the key to success in any type of organization and teamwork.

Languages

Castellano: Native.

English: Professional
